Know Your Patio Cover Kit

ALUMCENTER LLC

The standard traditional system consists of 3"× 3" posts, a 2"× 5" support beam, 3" wall header, 3" insulated roof panels, fascia, and e-gutter.

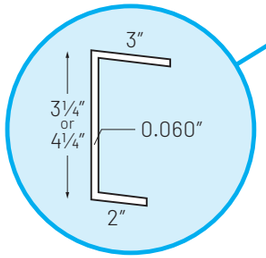

Fascia

Covers the panel sides and provides a clean finish.

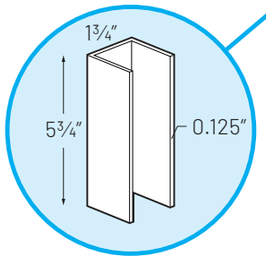

3" Wall Header

Connects to wall or fascia and receives the roof panels.

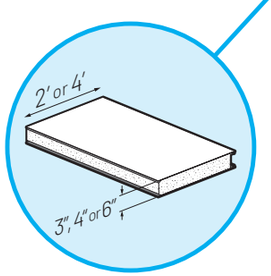

Receiving Channel

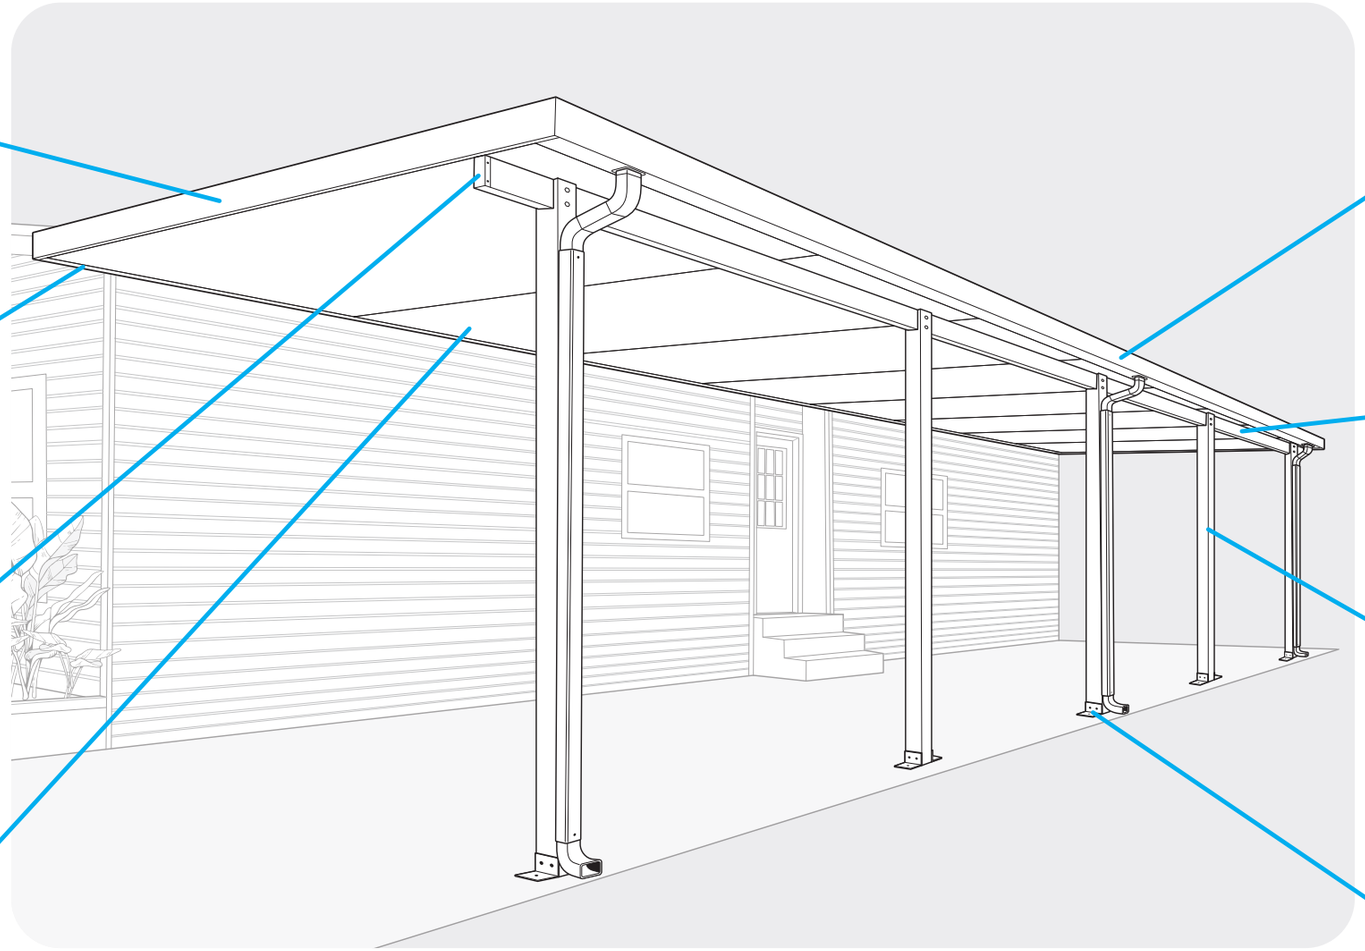

Connects beam to wall in L-shape installations.

3" Insulated Roof Panel

Interlocking panels that form a solid, insulated roof surface.

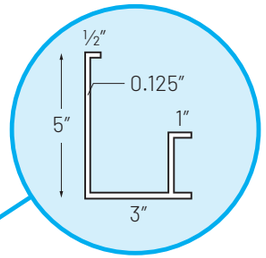

Available upgrades:
4"× 4" or 6"× 6" posts; 2"× 6", 2"× 8", or 3"× 8" beams; and 3", 4" or 6 " panels.

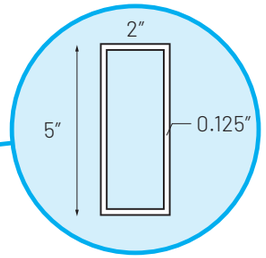

E-Gutter

Covers the panel front and channels rainwater.

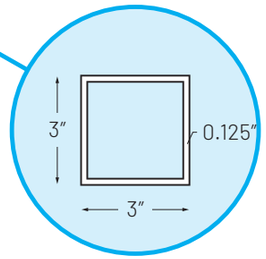

2"× 5" Support Beam

Horizontal beam that carries the roof load.

3"× 3" Post

Vertical supports for the front beam.

3"× 2" Clip Angle

Secures the posts to the slab and finishing pieces.
